### - Frontend Project – Developer Portfolio :-

- A personal portfolio website built using **React ,SCSS, JavaScript and Bootstrap** to showcase skills, projects, and experience in a modern and responsive layout.

<https://github.com/elshourbagi97/My-Portfolio>

### - FrontEnd project (Ecommerce website) :-

- A simple ecommerce website using **HTML, CSS, and JavaScript**. Focuses on layout, product display, and user interface to simulate an online shopping experience.

<https://github.com/elshourbagi97/ecommerce-website>

### - BackEnd project (Online Quiz) :-

- This is a simple **Online Quiz** application built using **PHP**. The application is designed for **teachers** to create quizzes and for **students** to participate and answer questions. It supports multiple-choice questions, correct answer validation, and result tracking.

<https://github.com/elshourbagi97/Online-Quiz>

#### - FrontEnd project (weatherApp) :-

- This is a simple Weather App that allows users to check the current weather of any location in the world. The app uses an **API** to fetch weather data, and users can enter the name of a city or use their current location to get the weather details. The app includes an animation to enhance the user experience.
